

Transition work:

1. Find out about the “6Cs” used in healthcare professions (6 values or behaviours essential for providing quality care). Produce a table listing each one, what it means and examples of how they can be seen in practice

Eg a nurse on the stroke ward might demonstrate “communication” by making sure that the patient and their relatives understand how a certain medication works

2. Do some research into one HEALTHCARE CAREER (maybe something you would like to do in the future?). Produce a recruitment poster. Find out:
 1. What the role involves (job description)
 2. What skills, qualities and attributes are needed
 3. What qualifications are needed, and how you can become qualified
 4. How much is the pay?
 5. Where would you work (what healthcare settings)?
 6. What could you achieve/move onto in that career?
 7. Don't forget to add pictures/illustrations/examples
